# AO Cyber Systems

# AOCodex.ai

## The private ethical framework for AI

AOCyber.ai    hello@aocyber.ai    Topsham, Maine

# WHAT'S THIS ABOUT?

## Ditching Fear and Uncertainty

AOCodex is a platform as a service that enables users to embrace AI while ensuring their *intellectual property* remains secure. A solution for the real world, built for real people, not just for edge use cases and technical experts, all without external influence.

**AI is complex but it doesn't have to be complicated.**

- Simplify workloads without increased cost or resources.

- Expedited returns on investment by optimizing processes.

- Reduce errors, and improving outcomes.

# Full Financial details on request

# Hasn't this been done?

## No, not like this

### Actually built different

No one until now has offered a product like ours. Purpose built for privacy, safety and, mass adoption.

Use our curated Agents, or build your own.

### For Teams & Individuals

Go beyond sharing prompts and results, equip your teams to execute the mission.

Our Individual users will experience a force multiplier with built in agents and automations.

### Use the best in class, no matter what tool

There is a lot of choice in the AI space and the answer isn't another provider, it's one that uses the best.

Our platfrom is multi-model, which means our pre built agents use the market leader specific to that task. OpenAI, Anthropic, Google, or whomever can be used under one subscription.

# WHY NOW?

## People Are Ready for Change.

🟠 **Trust & Safety**

Our guardrails keep you safe from data losses, leakages and, theft.

Keep out fake news and bad data.

It's verifiably trustworthy, getting data from you directly whenever possible.

🟠 **Consistent**

We allow you to build your voice, untainted and authentically your own.

Load your documents, and surface what you have already created, while informing our platfrom how you talk, what you like and what you don't.

🟠 **Christian**

The framework for everything we do is based on Judeo-Christian values. Ethics are not optional.

Conservative technology providers like us are uniquely positioned right now to influence the entire technology space.

# WHAT ABOUT COMPETITORS?

## GOOGLE

Google's AI focus is only focused on it's own infrastructure.

You can use their best features in our platform.

## OPENAI

OpenAI is an AI research company focused on LLM advancement not user experience.

You can use their best features in our platform.

## ANTHROPIC

Anthropic is the primary competitor of OpenAI and is another model provider

You can use their best features in our platform.

## OPEN SOURCE AND OTHERS

Avoid the do it yourself with no support and requires too much to get started.
We provide the best of the AI world, tested, curated, secure.

# WHY ARE WE ENTERTAINING INVESTMENTS?

We built the software.
Now we need to unveil it to the masses.

We are only entertaining investments from like minded individuals because with the right partnerships this will be the new standard in technology.

Build it

Market it

Teach everyone how to use it

# HOW THE FUNDS WILL BE USED.

## Prompt School

We are building online training platform for regular people to learn how to use any AI tool to it's full potential.

## Multi-Media Platform

Our one key missing feature - Voice, Image and Video Generation needs to be taken from Proof of Concept to production.

## User experience

We have a rich history of excellent customer service and we will scale how we do it across everything we do.
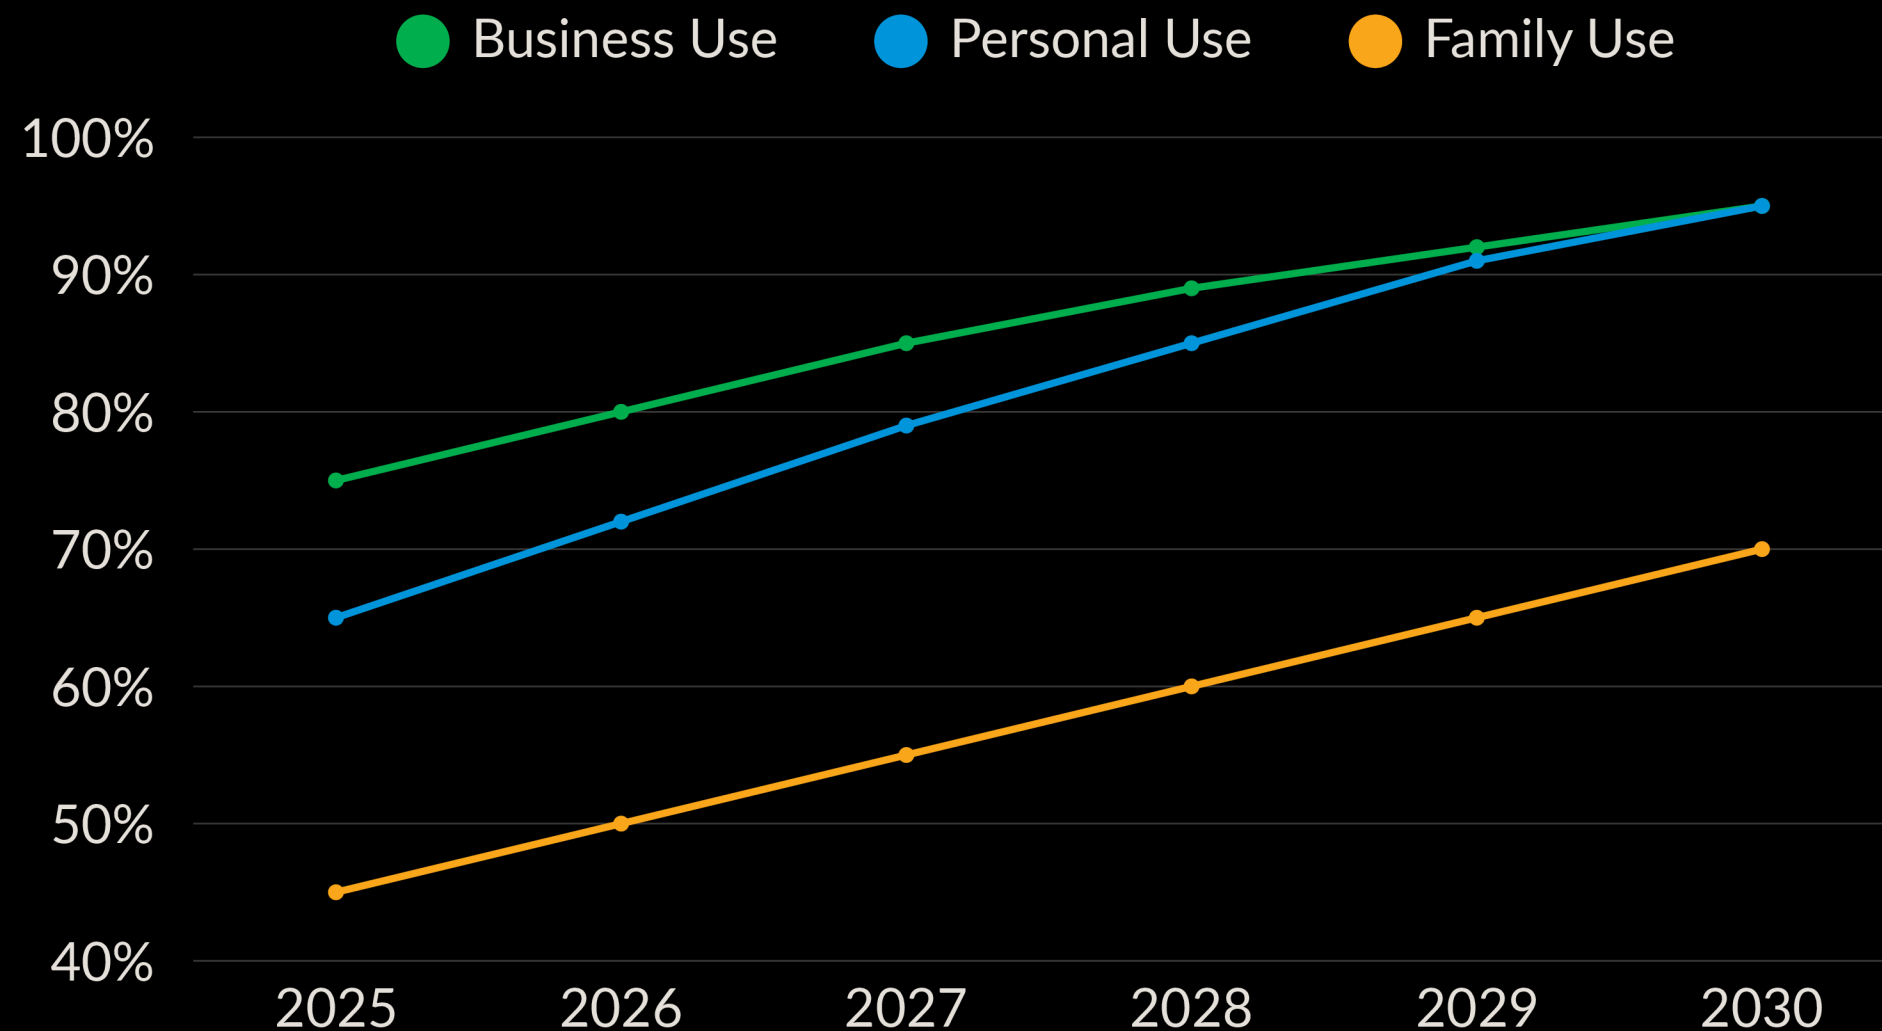

## HIPAA & Specialized fields

We built the privacy already, now we need to certify it. 3$^{rd}$ party audits and expanded trials for real enterprise clients.
